

## Horse and Goat Tour

- Destination: Caprinehoeve (Gits) and Keros nv (Passendale)
- Time: Friday, 30 August 08.30 to 16.30 h
- Total distance: 155 km

The **Caprinehoeve** is a dairy goat farm built in 2015. After starting with 400 animals, the capacity has grown actually to about 1.100 goats. Every year around 400 kids are born, which are used for selection and replacement. Most goats belong to the 'White Saanen' breed, known for its good milk performance. In the barn you may also observe goats with a colored coat, which is the result of breeding with Nubian, Toggenburger and Alpine goats, keeping in mind the selection on strong legs, udder quality,...

**Keros NV** is a certified reproduction center for horses. Throughout the years the center has acquired an excellent expertise and reputation in the field of artificial insemination, embryo transfer, birth coaching and adoption of orphan foals. In 2016 the center transplanted over 1000 embryos with a success rate of more than 80%, which implies that they are one of the largest and most efficient embryo transplant centers in Europe. Besides, the center has experience in the guidance of problem mares, insemination with frozen semen and deep intra-uterine insemination.
